

April 26, 2021

Mr. Peter Zaffino, President and CEO  
AIG Headquarters  
175 Water Street  
New York, NY 10038

**Re: AIG's Policies on Coal, Oil, and Gas Underwriting and Investing**

Dear Mr. Zaffino,

On behalf of the 73 undersigned organizations, we urge you to align AIG's business practices with a sustainable future by immediately ending support for new fossil fuel projects and rapidly ending services for existing fossil fuel projects and companies not in line with a [1.5°C limit to global warming](#).

We know that to avoid the worst impacts of human-induced climate change, it is crucial to transition as quickly as possible away from carbon- and methane-intensive industries. Many insurers have begun withdrawing support for the fossil fuel sector, as shown by Insure Our Future's [2020 Scorecard](#) on Insurance, Fossil Fuels and Climate Change. To date, [26 major insurers](#) have ended or limited underwriting support for coal, 11 have limited or ended cover for tar sands oil, and 3 have ruled out insuring oil and gas drilling in the Arctic.

Under your predecessor, AIG failed to restrict any of its services for coal or oil and gas projects and companies. **You can make AIG a bold leader among U.S. insurers by enacting policies that align AIG's underwriting and investments with a 1.5°C limit to global warming — the only path to a safe future.**

The climate crisis is already harming the global insurance industry. Natural catastrophes caused [\\$76 billion in insured losses in 2020](#). This was the fifth costliest year for the industry since 1970, primarily driven by worsening wildfires and storms in the U.S. At the same time, exiting the coal sector can [boost insurers' valuations](#) and [reduce risks](#) of future liabilities and stranded assets as the world moves to clean energy.

We are calling on AIG to adopt the following measures, in line with the Insure Our Future 2021 campaign platform:

- 1. Immediately stop insuring new and expanded coal, oil, and gas projects.**
- 2. Stop all insurance cover for existing coal** sector clients.
- 3. Phase out insurance for oil and gas** companies, in line with a 1.5°C limit to global warming.

- 4. Divest from coal, oil, and gas companies** whose businesses are not consistent with a 1.5°C limit to global warming.

While AIG continues to support the fossil fuel industry, the projects it insures are devastating the environment and violating Indigenous rights. The Trans Mountain pipeline in Canada has had [85 spills](#) to date, contaminating the water and land of First Nations peoples who have put up strong resistance to the pipeline and its proposed expansion. The pipeline's expansion would lock in further [destructive extraction of Alberta tar sands](#), stripping new swaths of boreal forests, creating more toxic wastewater ponds, and releasing additional air pollutants that harm the health of Indigenous communities. Following Indigenous-led pressure, insurers Zurich, Munich Re, and Talanx dropped their coverage of the project. We are further calling on AIG to:

- 1. Commit not to insure the Trans Mountain pipeline and its expansion** in advance of the August 31, 2021 renewal date.
- 2. Commit to uphold Indigenous rights by denying coverage to projects that do not have the Free, Prior, and Informed Consent** of impacted communities.

As one of the largest providers of insurance to the fossil fuel sector, AIG's inaction on climate change is unacceptable. We urge you to take swift action to end AIG's support for fossil fuels and invest in a sustainable future.
